
N O T A

Pelas características intrínsecas que apresenta o CATÁLOGO DE LEPIDÓPTEROS DO URUGUAI, a Sub-Comissão de Divulgação da Revista do Centro de Ciências Rurais resolve publicá-lo em forma de suplemento e, desta forma, espera poder contribuir com mais esta bibliografia no Campo Entomológico.

CATÁLOGO DE LEPIDÓPTEROS DO URUGUAI*
Catalogue of Lepidoptera of the Republic of Uruguay.

Ceslau M. Biezanko**, Agustin Ruffinelli*** e Dionisio Link****

RESUMO

Os autores apresentam uma relação de 1190 espécies de Lepidópteros registradas para a fauna entomológica da República Oriental do Uruguai.

SUMMARY

The authors present a list of 1190 species of Lepidoptera annotated for the entomological fauna of the Republic of Uruguay.

INTRODUÇÃO

Há mais de vinte anos foi iniciado o estudo dos lepidópteros pertencentes à fauna uruguiaia.

O primeiro trabalho foi publicado em 1957. Até aquela data somente 330 espécies haviam sido registradas para o país. Estudos posteriores permitiram citar mais 860 novas espécies para a fauna uruguiaia. Em sucessivas contribuições (1962, 1966, 1968, 1973, 1976) foram dados a lume, os resultados do estudo continuado do abundante material procedente de diversas coleções.

Consideramos que com a Nota complementaria VI (1976) não se devia encerrar a série "Lepidoptera del Uruguay" devido a inúmeras espécies que vivem neste país, as quais não foi possível, por enquanto, identificar.

Pretende-se também, continuar a série "Fauna de lepidópteros del Uruguay" da qual somente dois fascículos foram publicados (VI. Hesperidae em 1967 e X. Agaristidae, Noctuidae et Thyatiridae em 1971).

MATERIAL E MÉTODOS

Baseando-se em novos materiais e respectivas bibliografias, eliminou-se as espécies de procedência duvidosa, constantes nas listas anteriores, foi, também, atualizada e retificada a nomenclatura.

Desta maneira, a lista que se apresenta atualmente, tem caráter de comprovação destas espécies no Uruguai.

Na presente lista inclui-se espécies que nunca foram vistas nas coleções estudadas e cujas citações acham-se em trabalhos de outros autores considerados fidedignos.

Este trabalho foi possível, devido à colaboração de especialistas, cujo nomes estão citados em trabalhos anteriores.

Na bibliografia somente citou-se aqueles trabalhos consultados e ainda não referidos nas publicações anteriores.

As espécies identificadas para a fauna do Uruguai, são ordenadas das alfabeticamente dentro das famílias, subfamílias e/ou tribos.
